DETAILED ACTION

Restrictions

[01] Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 & 8, drawn to a method for establishing the position of an endoscope relative to a subsurface structure in a volumetric scan data set, classified in class 600, subclass 117.
- II. Claims 6-7, drawn to a method for calculating and displaying a set of possible endoscope tip positions from which there is a direct line of sight to a target point, classified in class 600, subclass 417.

[02] Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as pre-surgical planning. See MPEP § 806.05(d).

[03] Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
